

## **FOREWORD**

The Annual Update of the **PLAN FOR THE DELIVERY OF EMERGENCY MEDICAL SERVICES IN EASTERN CONNECTICUT** contains the following information:

- A listing of Communities forwarding copies of Local EMS Plans to the Council.
- Progress with First Responder SAED Designation and Authorization.
- Progress with the Designation of Basic Ambulance PSAs.
- Authorizations of new MIC levels, including Epinephrine Auto-injectors.
- Recommendations granted for new EMS-Instructors.
- Evaluations of EMS-Instructors completed during the two-year period.
- EMS courses conducted within the Region.
- Total number of student examinations conducted within the Region.
- Updated Plan Section: “Listing of Municipal Resources & Demographics”.
- EMS Provider Activity Summary for calendar year 2002 by municipality.
- Completed Bioterrorism Needs Assessment Tools within the Region.

The State and Regional EMS Plans contain many objectives. State-wide priorities for the development of the EMS system have not been established. This year, \$100,000 was made available to EMS providers across the State through the “EMS Equipment Grant Program” established by the Legislature in 1998. There is not a statutory mandate for implementing objectives contained in the Plans. Consequently, all progress has been made on a voluntary basis. There is not adequate administrative support for the volunteer departments to aid in accomplishing many of the goals and objectives.

Increased workloads and insufficient resources at the Regional Offices also impede progress by hampering communication and interaction with local municipalities and EMS organizations. There is a need for much more financial assistance if significant progress is to be expected.

Jonathan S. Lillpopp  
Regional EMS Coordinator
